### Simple and Complete – Small Business Voice, Data & Networking

Sutus Business Central is a **complete office communications solution** that provides voice, data, and networking tools for businesses under 25 employees.

Integrated into a single enterprise-quality solution, these tools are secure, easy to install, and affordable and have no hidden IT, integration, software, or training costs.

#### Phone System

**Business Phones** – Enjoy the same telephone features as large businesses.

**Voicemail and Unified Messaging** – Store and retrieve voice messages from a telephone or e-mail inbox.

**Auto-Attendant & Company Directory** – Ensure that all calls receive a professional greeting and are routed to the correct person.

**PSTN and/or VoIP** – Use your existing phone lines and costs by routing calls over the Internet.

#### Data Services

**File Sharing** – Improve productivity by sharing storage space, documents and more.

**Email Server / Web Server** – Reduce overhead by hosting your own e-mail and website.

**Group Calendaring** – Create and share schedules company wide.

**Printer Sharing** – Access network printers from any PC.

**Internet Access** – Share a single Internet connection across your office.

#### Network Infrastructure

**LAN/WAN** – Access data securely from inside or outside your office.

**Multiple Operating System Support** – Connect Microsoft, Apple, and Linux PCs.

**Wireless Access** – Expedite connections and simplify moves – no wires.

**Data Security** – Protect your data with built-in enterprise quality firewall and VPN.

## Finally, a set of technology-based business tools for the non-technical user!

Sutus Business Central uses the capabilities of today's technology to power a sophisticated set of tools that are bundled into a single, affordable solution that is...

- **Simple to use** – No technical knowledge required.
- **Simple to manage** – No in-house IT expertise required.
- **Simple to expand** – No hidden costs, licenses, or special hardware.

## Is Sutus Business Central right for your business?

Effective business tools address the specific needs and goals of your business. If you answer "Yes!" to any of these questions, Sutus Business Central is the solution for you.

- ✓ When you relate to your customers and clients do you need to:
  - Greet them by name when they call?
  - Access their information immediately?
  - Be available quickly from wherever you are?
- ✓ Does your company want to project the professional image of larger enterprises while still offering personalized service?
- ✓ Do you and your staff want the flexibility of working outside the office while still having access to company and customer information?
- ✓ Do you want to enable your customers to reach you anywhere when they dial your office number?
- ✓ Do you want to offer your staff the benefits of today's business tools without having to understand technology?
  - Enable your staff to work remotely.
  - Facilitate collaboration on projects and other business-related matters.
